## UM system discusses student fee increases

Rolla representatives voice their views about student fee increases to representatives of other UM campuses.

Jeff Leong  
Staff Writer

A video conference was held this past Thursday, September 14, regarding student fees and other financial duties in the University of Missouri System. The meeting was led by the Chancellor of the University of Missouri in Columbia, Charles A. Kiesler. Representatives from all four campuses participated in this video conference and representatives from the Rolla campus included Don Askeland, professor in the Mining and Metallurgy department; Anita Chancey, Mathematics graduate student; Diane Alt, Chemistry undergraduate student; Virginia Ryle, Executive assistant to Vice Chancellor of Academic Affairs; and Keith Blackford, StuCo President.

One of the issues addressed in this conference included the rate of increase of student fees for the five-

year period starting in 1997. These fees, including the engineering fee, are what students at UMR are worried most about. The goal of UMR representatives is to influence the Board of Curators to increase the fee by only the Higher Education Price Index (HEPI). HEPI is comparable to the Consumer Price Index. Diane Alt responded to this concern, "Students understand HEPI more than a total cost increase." In the past, this rate has been increased by a rate more than HEPI.

The main concern with the engineering fee is why engineering students have to pay a \$32.70 fee for every credit hour even if the class does not involve engineering. This fee was originally an equipment fee used to maintain labs and equipment inside of them.

These issues are being researched by The Student Fee Action Team. The team is looking for students to help influence the Board to keep student fee increases down. The team meets every Thursday night at 7:30 in the Missouri Room in the University Center East Building.

## Industry Career Day returns to UMR

Amy Jones  
Staff Writer

Representatives from over seventy-five companies will travel to Rolla Thursday, September 28 for the 27th annual Industry Career Day hosted by The Career Opportunities Center (COC) from 9 a.m. to 3 p.m. in the Multi-Purpose Building.

COC Director Jamie Archer encourages all students to attend Industry Career Day: "It really gives students a chance to interact with companies outside of a formal interview." Anticipating the largest company turnout of the past ten years, Archer also points out that Industry Career Day is "an oppor-

tunity for [the students] to see a lot of companies at one setting." Upon entering, students receive a name tag and a program showing the layout of the booths. In addition, signs are mounted above each booth, indicating the company name and majors sought for positions.

Chris Sowers of the COC commented on dress: "Students are encouraged to wear their 'interview suits,' especially those that are at the point of interviewing and want to make the most favorable impression." Sowers stresses, however, that students should not let a lack of the proper clothing keep them from attending. "Not all students dress up; many just drop by between classes."

These fairs are held at "the first part of the semester to help students get jobs for that semester and to let stu-

dents meet someone in a variety of industries to find out what the job perspectives are, straight from the horse's mouth," Sowers commented.

Most companies send a variety of literature, presentations, displays from two to five representatives; so while students may expect to spend some time waiting in lines, usually the wait will not exceed ten minutes.

Students interested in learning more about how to make the most of Industry Career Day are invited to view a sixteen minute film titled "How to Make a Job Fair Work for You" located in the COC.

Students should also note that the COC will be closed September 28 and should remember to pick up stickers as they leave Industry Career Day.

The COC will host another career fair on February 28, in Centennial Hall.

## Computer thefts rise over summer

Roy Jacobs  
Staff Writer

The University has seen a dramatic increase in computer theft in the past several months. According to Bill Bleckman, director of University Police, crime like this usually goes down during the summer semester because only a few students are here attending classes. When students come back in the Fall and Winter semesters crime of this sort goes up. But this has not been the case this year. From mid March to early July over twenty-eight thousand dollars of computers and computer equipment was taken from labs across campus.

Among some of the stolen equipment was an Ambra Pentium taken from an office in the Mechanical Engineering annex still in its box unopened on March 21 and a hard

drive along with 16 megs of RAM were taken from a library computer on March 28.

On June 13, ten 8-meg SIMMS from the Macintosh lab in the Humanities building. Again on July 27 both Macintosh labs were hit in the Math-Computer Science building. In room 206 twenty 2-meg and twenty 1-meg simms memory chips were taken. Eight more chips were taken from room 104.

14 CD-Rom Disks were also taken from the library during the summer.

The latest theft occurred over July 4 at the library when a Pentium 90 Multimedia system with monitor, keyboard and mouse was taken.

In a cooperative investigation with University Missouri at Columbia thru an informant, UMR police know of a suspect who had just been released from prison. While in prison he took courses in Personal Computer repair. This suspect was known to be in the Rolla area at the time of these thefts. Also at this time a computer store in

town was robbed along with a car that was parked on the parking lot of the computer store.

When the suspect was questioned by Columbia Police he was arrested for possession of illegal drugs and sent back to prison for violating his parole. It is still not known if this suspect can be connected to the thefts here on campus or in town.

David Dearth, Director of Computing Services, says that they are working on ways of making the CLC's more secure to deter theft. Dearth goes on to say that it would be very expensive to put an alarm system on each and every computer. Though some labs do have "hidden cameras" for added security, along with security cables that are attached to every terminal, still more is needed.

University Police ask that if at any time you see someone who you think does not belong in a CLC please notify a CLC monitor or University Police.

# What's Up at UMR

## Wednesday

2:30 pm: Resume Writing Workshop, 201 Norwood

2:30 pm: StuCo Lawyer, Walnut

6:00 pm: Aikido Club Practice, 304 Rolla

6:00 pm: Wesley Foundation - Breakaway, Wesley

7:00 pm: ASCE Meeting, 114 CE

7:00 pm: Miner soccer, Lincoln University, UMR Soccer Complex

8:00 pm: Kappa Kappa Psi Meeting, 215 ME

8:00 pm: Tau Beta Sigma Meeting, 216 ME

9:00 pm: Newman Center Mass, Newman

## Thursday

1:30 pm: Academic Council meets, G-5 H-SS

3:30 pm: EE Power Engineering seminar, 103 EE

7:00 pm: Billy B. RecycleMania!, Leach Theatre, Castleman

12:00 pm: Intersarsity Christian Fellowship Bible Study, Walnut

12:00 pm: Live videoconference: "Multimedia Fair Use Guidelines", 203 CLW Library

12:30 pm: Newman Center Scripture Study, Newman Center

6:00 pm: Christian Campus Fellowship Meeting, Mark Twain

6:30 pm: American Nuclear Society Meeting, 227 Fulton

6:30 pm: SHPE Meeting, 216 McNutt

7:00 pm: Video presentation: "With our Own Eyes", First United Methodist Church

7:30 pm: St. Pat's Committee Meeting, 107C ME Annex

8:00 pm: Solar Car Team Meeting, 201 Engr. Mgt.

## Friday

4:30 pm: Gaming Association Meeting, 314 & 317 CE

5:00 pm: IFC Greek Week Carnival, Lion's Club Park

6:30 pm: International Coffee Hour, Immanuel Lutheran Church

7:00 pm: Newman Center Social, Newman Center

7:00 pm: Show-Me Anime Meeting, 204 McNutt

7:00 pm: SUB Movie: The Shawshank Redemption, 104 ME

8:00 pm: Celebration Concert in honor of Prof. Jim Pogue, Leach Theatre, Castleman

9:00 pm: SUB Movie: The Shawshank Redemption, 104 ME

## Saturday

9:00 am - 12:00 pm: Newman Center - Woodcut, Newman Center

10:15 am: MSM/UMR Athletic Hall of Fame induction ceremony, Centennial

1:30 pm: Miner football, Northwest Missouri State University, Jackling Field

6:00 pm: MSPE and MSM-UMR Alumni Assoc. annual shrimp feed, Lions Club Park

7:00 pm: SUB Movie: The Shawshank Redemption, 104 ME

8:00 pm: UMR women's basketball team annual "Moonlight Golf" tournament, UMR Golf Course

9:00 pm: SUB Movie: The Shawshank Redemption, 104 ME

## Sunday

1:00 pm: Rugby Club Homecoming Rugby Match, UMR Rugby Field

2:00 pm: Chinese Student Association Classes, 105, 117 ME

4:00 pm: Alpha Phi Alpha Meeting, Silver & Gold

5:00 pm: Newman Center Student Mass, St. Patrick's Church

6:00 pm: Wesley Dinner and Chapel, Wesley House

8:30 pm: Omega Sigma Meeting, 204 McNutt

## Monday

12:00 pm: Toastmasters International meeting, Missouri

5:30 pm: Gamma Beta Sigma Meeting, Mark Twain

6:00 pm: Aikido Club Practice, 304 Rolla Bldg

6:00 pm: Independents Governor's Meeting, Silver & Gold

7:00 pm: National Society of Black Engineers Meeting, 204 McNutt

8:00 pm: Eta Kappa Nu Help Session, 102 EE

## Tuesday

4:30 pm: GeE seminar, speaker TBA, 204 McNutt

4:30 pm: Student - MSTA Meeting, G-8 H-SS

6:00 pm: Chi Epsilon Smoker, Mark Twain

6:30 pm: Student Council Meeting, 204 McNutt

6:30 pm: Tau Beta Pi Meeting, 114 CE

7:00 pm: Fall Film Series, "Once Were Warriors," 104 ME

7:30 pm: St. Pat's Committee Meeting, 107C ME Annex

8:00 pm: Chi Alpha Meeting, Meramac

8:00 pm: Circle K Meeting, Missouri

## Next Wednesday

12:00 pm: Booster Club meeting, G&D Steakhouse

3:30 pm: Lady Miner soccer, Quincy University, UMR Soccer Complex

4:30 pm: Chemistry seminar, "Creation and Detection of Organic Intermediates by Matrix Isolation," G-3 Schrenk

6:00 pm: Aikido Club Practice, 304 Rolla Bldg

6:00 pm: Wesley Foundation - Breakaway, Wesley House

7:00 pm: AGC Meeting, 114 CE

7:00 pm: AIChE Meeting, 104 ME

8:00 pm: Kappa Kappa Psi Meeting, 215 ME

8:00 pm: Tau Beta Sigma Meeting, 216 ME

9:00 pm: Newman Center Mass, Newman Center

## Announcements/ Financial Aid

Has your experience at Rolla been positive? Do you feel Rolla has lots to offer students like you? Would the presence of other people from your hometown on our campus help you mooch rides home now and then? Does the Southwest Airline phrase "Friends Fly Free" mean anything to you?? If you answered yes to any of the questions above, then you should consider visiting your home town over the Thanksgiving of Christmas break to talk about the University of Missouri-Rolla!!!

A visit by a current Rolla student (that would be you!) to your high school

math or science class helps the Rolla Admissions office continue to recruit a well-qualified, diverse student body. We are offering short (very short!!) help sessions to give you guidance on how to make your visit a positive experience. We will also provide you with brochures and response cards to track the success of your visit.

If you are interested in this program, please call the Admissions office at 341-4164 or 341-4165 to sign up for a help session or obtain further information. You only need attend one help session. The sessions are scheduled for November 14, 15, 16 or 17 (Monday, Tuesday, Wednesday, or Thursday) from 2:30 pm to 3:30 pm in G-1 Conference room in Parker Hall. The Rolla Admissions office looks forward to working with you to bring talented students to our campus.

## Missouri Miner

The **Missouri Miner** is the official publication of the students of the University of Missouri-Rolla. It is distributed each Wednesday afternoon at Rolla, Missouri and features activities of the students of UMR.

All articles, features, photographs, and illustrations published are the property of the **Missouri Miner** and may not be reproduced or published without written permission.

The **Missouri Miner** encourages comments from its readers, and will attempt to print all responsible letters and editorial material received. All submissions must have a name, student ID number, and phone number for verification. Names will be withheld upon request.

Submissions for publication must be in our drop box (first floor of the Norwood Hall, Room 103) by 3:30 p.m. on the Thursday before publication. Submissions, not including personals, will be accepted through E-mail (Internet) at MINER@UMR.EDU. The **Missouri Miner** reserves the right to edit all submissions for style, grammar, punctuation, spelling, length, and matters of good taste.

The **Missouri Miner** is operated by the students of UMR and the opinions expressed in it do not necessarily reflect those of the university, faculty, or student body.

## PRINCIPLES of SOUND RETIREMENT INVESTING

## EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

**T**oday there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

### WE'LL HELP YOU BUILD A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg—from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable

annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.\* That means more of your money is where it should be—working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management—managing more than \$145 billion in assets for more than one and a half million people throughout the nation.

### TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

Ensuring the future  
for those who shape it.™

\*Standard & Poor's Insurance Rating Analysis, 1995; Lipper Analytical Services, Inc., Lipper-Directors' Analytical Data, 1995 (Quarterly). CREF certificates are distributed by TIAA-CREF Individual and Institutional Services.

## The Life and Times... Do or Do Not

Aloha, all you hard-working students and test-giving professors out there! Welcome to yet another week of life in the not-so-big-city. Can you believe that it's already the fifth week of the Fall semester? Time certainly does fly these days, doesn't it?

Now, there could be several reasons why the time seems to be going so quickly of late. First of all, Planet Earth may have mysteriously increased its rate of rotation, decreasing the number of hours in each day. Secondly, aliens from Deep Space 14 may have come up with a dilithium tricorder sonic death ray that feeds off of all the clocks in our world--making them lose exactly 4.2 minutes per hour--in order to gain enough energy to take over either our entire solar system or MGM studios, whichever comes first. But the last--and obviously most ridiculous--answer to the question of "where does all the time go?" is this: *stuff*.

Yes, we here at the University of Missouri-Rolla have more *stuff* to do than any other group of individuals on any planet. Tests and homework rule our lives, with lab write-ups making up for any free time that the other two may have neglected to fill. So, boys and girls, this week I bring you yet another of my oh-too-valuable public service announcements to make your exist-

ence at UMR just a little bit more enjoyable, tolerable, and perhaps a bit less suicidal. See, with all the lists you're probably making of stuff to do before 3 p.m. today, you are in desperate need of someone telling you *not* to do something, right? Therefore, I present the following. No need to thank me. Just make a sacrifice for my E.I.T. score.

### Things NOT to Do:

#### Do not:

- 1-take life too seriously.
- 2-shoot your professors--they're just people, too, and besides, prison orange really isn't anyone's best color.
- 3-eat frozen yogurt and do Calculus at the same time. The combined power of the two into a single brain freeze will leave you utterly useless to do anything with your life other than watch reruns of that infomercial for the food dehydrator. (Is it just me or is that guy with the funny hat just a little too eager about his beef jerky and fruit roll-ups??) Always eat your yogurt first. The Calc is optional.
- 4-analyze video games for their lack of obedience to the laws of physics. It won't help your game any and all you'll get out of it is a headache and an F on your Phys 23 test.
- 5-forget to hug your teddy bear.

6-leave your disk (beige with blue label) containing all of the stuff in the classes from your major (M.E.) in a computer lab. (Yes, we are definitely speaking from experience, here. Here's my plea of the week: *If anyone out there has my disk, marked M.E. Stuff--I can't remember if my name is on it or not--and last seen in M.E. 121 computer lab, please leave it at the Miner office or deliver it to me personally (I never leave the M.E. building). I really need it back!!! Thanks!!!*)

7-get embarrassed from tripping on the sidewalks on or around campus... I've done it enough for everyone in the past week, so don't feel so bad.

8-go hiking at Lane Springs while wearing shorts. This author highly recommends jeans, instead. (Can we all tell how much of these columns are gained from personal experience? I knew that we could.)

9-think that just because you are surrounded by technological-type people that you cannot express yourself, be your own person, or that you have to be perfect 100 percent of the time. No one is perfect all the time, and frankly, we are in desperate need of folks on this campus who know who they are and are not afraid of showing

see Life, page 21

## It's Never Too Early

Brian Gosnell  
Staff Writer

It may seem like there's a long time until St. Pat's comes around, but it's really almost here. The Sweatshirt Design contest is over and that can only mean the '96 Green is coming soon. So right now is the perfect time to start saving up money so you can be the first to wear the greatest shirt in Rolla. Keep an eye on the Puck because the St. Pat's Committee will be selling Green there every school day as soon as it comes out. With the Float and Parade theme soon to be announced, it's also a great time for your organization to elect a float chairman. The quicker you get organized, the more time you

have to be working on the first place float entry.

Organizations might also want to find a nice tree and pull it up for a cudgel. If you've ever done a cudgel before, you know how time consuming it can be. While out looking for a cudgel, the freshmen might want to get their shillelaghs. The snakes will be invading Rolla again this year and it's a lot more fun killing them with a dried out shillelagh than with a waterlogged one. It might also be a good idea to start a workout program to get into shape. Skill and ability will be necessities at Gonzo and Games because the physical challenges and the competition will be tougher than ever. It's never too early to start getting ready for St. Pat's '96. There's plenty of things to be done and not much time to do them because the Best Ever St. Pat's '96 is only 176 DAZE away!

## Camping, Anyone?

Looking for something to do on StuCo Free Day? The Bicycling Club and Student Wellness Committee are planning to hike or bike the Berryman Trail in Potosi on Friday

and Saturday. The group will be camping out Friday night. For more information about the trip, call Stephanie Franklin at 341-4225.

## Ask Me Anything...

Greetings and salutations my loyal readers!!! Well, have I got something for you today... It seems that at long last, someone has decided to ask me a question - and I have an answer (the best part of the question). So, I will get on with the story, and a very big thanks to Eric U. for his question.

If you've driven down State Street (by the Chancellor's house) lately you might have noticed that on the previous site of one of the temporary buildings now sits a bricked slab in a sculpted hillside facing the street. Well, my curiosity was sparked by Eric's question, so I decided to investigate (actually, it was the only question I had so I kind of had to investigate it or I would have been forced to make something up again - and I just couldn't do that to you guys). I called over to Physical Facilities, and was put in touch with Steven Zernicke, the manager of Buildings and Grounds for the campus, and have I got some information for you guys!!! It appears that the campus is getting a bonfire pit to be used on Homecoming weekend and for other campus activi-

ties.

According to Mr. Zernicke, the Chancellor's office originated the idea of a bonfire site/greenspace after the temporary buildings were razed this spring and summer. Then Physical Facilities, and subsequently Mr. Zernicke, were left to design the platform. At the time of the interview, Mr. Zernicke could not give me the exact cost for the project, but he noted that the project was funded out of the annual Physical Facilities budget and no special fund

allocations were made. He then told me that the project really got off the ground when A. P. Green Refractories, Inc. (home to many UMR alums), donated approximately \$5,000 worth of refractory brick for the fire pit.

the intense heat in August which made laying the brick nearly impossible for the workers. However, it will be ready for the Homecoming Bonfire on the night of October 6. The ground crew will wait to seed the site until after the Homecoming festivities. Then, the

grounds will be hydro-seeded and landscaped with planters, a few small trees, and some benches. The interesting point about the seeding is that on the slope facing the street, there will be a contrasting darker colored grass spelling out UMR (see figure). The darker grass will be a new hybrid developed at UMC called Buffalo Grass (the seed for this was donated by the University AG center). Mr. Zernicke thinks that this will provide both an interesting contrast and low upkeep if the grasses grow as planned.

Well, I hope that sums it all up, and thanks again for the question, Eric. Gee, guys, you too could have your name in the paper if only you would ask me a question... So, for those of you that have been sleeping through the first part of the semester, I will tell you again: You may contact me on e-mail at [janson@umr.edu](mailto:janson@umr.edu) or, you may drop off your question in the Features mailbox in room 103 Norwood Hall. That's it until next week, when only I will know what kind of story I will have...

--Charles Janson

J. Andrew Dare

# Pedro's Posada Student Disciplinary Action

I reached into my wallet and pulled out my student ID. "Just think, Andy--in five minutes, you'll no longer be waiting in line, but be back in your room studying! Life doesn't get any sweeter than this." Interrupting my dreams of Dynamics and Stratigraphy, the young man in front of me called out, "Hey, it's Ugly Boy!" I swiveled my head around to see the recipient of such refined remarks. Immediately, I was hurled back into Junior High, the kingdom of such phrases. I raged with anger and flooded with sympathy. Why would an intelligent young man so maliciously degrade a fellow student? Why degrade a fellow human?

Reflecting on this disturbing behavior, I have come to a few conclusions. First, people utter these words to feel powerful. Second, people Do Not Think before speaking.

First, nobody likes to be called "Ugly Boy!" Nobody! People do, however, seem to enjoy gathering around the table for dinner and commenting on the unaccepted persons in society--the unattractive, the overweight, the less intellectual, the poor. They reason that "I may not have everything going for me, but just look at that! At least I'm not one of those underfashioned, ignorant nightmares!" People get a phony feeling of

acceptance and power from belonging to the more received crowd. Indeed, it's almost an infantile pastime to run others headlong into the ground, achieving status via degradation.

Second, people often do not think about the consequences when poking humor at others. Instead, they have an uncanny tendency to talk to others based on stereotypes, not true personalities. To make this more real to me, I had the opportunity to attend the campus-wide leadership forum on September 9. At one of the workshops, a stereotype was taped to each participants' back. Then, we set about the room to call each other names according to our respective stereotypes. I walked up to a "frat boy" and started talking about frothing beer and fast women when he interjected, "Hey, buddy, can't you talk in more than one syllable?" I recoiled, thinking over how I was stereotyping him and trying to rebutt his statement. "Andy, you idiot! He's just stereotyping YOU!" For a brief moment, I was given junior high nostalgia once again--that old, familiar pang of pain that comes from taking insults. It hurts.

Further, the pseudo-commanding stance degradation gives its users raises subtle, often subconscious ques-

see Pedro, page 21

The purpose of the judicial affairs process is to handle violations of university rules and regulations. This procedure is an administrative process, not a legal one, such as in a court trial. The purpose of the administrative hearing is to determine if a preponderance of evidence exists, and if so, to impose sanctions related to violations of University rules and regulations.

The Division of Student Affairs wants to create awareness in the campus community about what University rules and regulations violate and what sanctions the University imposes on violators of the code of conduct. While 21 students were investigated, not all received disciplinary action. Of the cases investigated during the Winter 1995 semester, 13 students received some form of disciplinary sanction. The kinds of violations and their respective sanctions follow:

"Forgery, alteration or misuse of University documents, records or identification, or knowingly furnishing false information to the University." - Three violations: Three students received letters of reprimand for forging a signature on a drop/add form,

a risk management compliance form, and for making a false 911 call.

"Physical abuse of any person on University-owned or -controlled property or at University-sponsored or -supervised functions, which threatens or endangers the health or safety of any such person." - One violation: The student received a letter of reprimand for threatening another student.

"Attempted or actual theft of, damage to, or possession of (without permission) property of the University or of a member of the University community or a campus visitor." - Five violations: One student received a letter of warning for misuse of a campus computer; four students were placed on disciplinary probation for stealing or damaging university property.

"Disorderly conduct or lewd, indecent or obscene conduct or expression on University-owned or -controlled property or at University-sponsored or -supervised functions." - One violation: The student received a letter of reprimand for post-

ing a chain message on the Internet.

"Manufacture, use, possession, sale, or distribution of alcoholic beverages or any controlled substance without proper prescription or required license or as expressly permitted by law or University regulations." - Two violations: Both students received letters of reprimand for having alcohol on University property.

"Violation of University policies, rules or regulations or of campus regulations, including --but not limited to-- those governing residence in University-provided housing, or the use of University facilities, or the time, place, and manner of public expression." - One student received a letter of reprimand for violation of policy.

\*Disciplinary probation may last from a semester to the length of time a student is enrolled and may involve a variety of educational sanctions.

If you have questions or concerns regarding these incidents or other matters related to judicial affairs, contact Dr. Camille Consolvo, Office of Student Affairs, 106 Norwood Hall, 341-4292, stu-aff@umr.edu.

# Second Time Around...

road trip, *n.* 1. journey by car with friends or acquaintances to drive nowhere in particular. 2. traveling for the purpose of building relationships, usually with no specific destination in mind; often undertaken as a rite of passage or stress-relieving exercise by college or university students: *The students went on a road trip after mid-terms to relax and get to know each other better.*

There you have it... the definition of road trip. I had mentioned in my first column this semester that one of the ways to have fun but stay out of trouble at the university is to take the occasional road trip.

"But wait," you say, "I saw Animal House. Isn't a road trip something where you drink a lot, trash cars, try to have sex, and so on?"

No. Do you see "drink," "carouse," "have sex," or "destroy things" in the definition above? That's right, you don't. A road trip is appropriately taken with a number of friends (usually the more the better!), and is BETTER enjoyed if the booze and other garbage is left out of it. If you don't understand the advantages of leaving the booze, sex, and immorality out of a good road trip, then you need to get a copy of the August 30 *Missouri Miner* and re-read

my first column this semester. Or, take my word for it, it's not worth messing up a good road trip with immoral stuff.

Okay, so what does make up a good road trip? The first rule is that a good road trip must have at least three people involved. Why three? Well, the relationship building that goes on in a road trip is best enjoyed by a larger number of people. Besides, if one of you gets sick, you still have two people to trade off on the driving. As mentioned above, though, the more on the trip, generally the more funds you have available for gas, goodies, etc.

What sort of people do you want on the trip? Well, there are a couple of basic rules here. First, you probably don't want to have someone who is rude and obnoxious. Wait! On second thought, if you all want to be rude and obnoxious to each other for the length of the trip (which can be kind of fun to do) then that person would be all right. Second, remember that you will be spending every second with this person for the next 24 or 48 or 72 or so hours, so if their personal habits or personal hygiene isn't too hot, you may not enjoy yourself as much. On the other hand, you probably won't be taking a bath for a while either, so don't get too picky.

To stay out of trouble, must you

only travel with members of the same sex? Nahhh! You're old enough to be able to spend a lot of time with someone of the opposite sex without getting all sexually hyped! Road trips are one of the best ways to get to know someone, so what better way to get to know anyone: not just that prospective girl/boyfriend, than on a roadtrip? Just stay out of trouble! One of my most memorable road trips (on my "First Time Around") was a spur of the moment trip to the California coast with two other guys and a girl. The "girl," who was at the time going with my roommate, was eventually, two-and-one-half-years later, to become my wife! I can always kid that the first night we spent together was on a beach south of Mindicino, California. Of course she was in a different sleeping bag, two people away from me!

That trip to the coast was a good one.... All we knew was that we had two days and that we were heading west. We didn't know where we were going for sure, we didn't know where we would sleep (though we all brought sleeping bags), and we didn't know how long the money would hold out. We got to the beach that first night, made a fire out of driftwood, and feasted on beans and pineapple (which

was in the label-less cans we bought special for the trip at the second-hand store. Two or three Hershey's bars, a couple trips up and down the beach, and hours of talking later, we finally realized we had nothing more to drink. No sodas, no water, nothing. Eventually, two of us found an old gallon wine jug and hiked up the road to talk a local into letting us clean out the jug and fill it with water at his outside faucet. (This does bring a good rule-of-thumb to mind: always take along something extra to drink, water or otherwise, just in case.) Though we had fun driving, talking, doing stupid card tricks, and eating salami, cheese, and pineapple, the best part of the trip came in the wee hours of the morning while we were on the beach. At about 2:30 a.m., my future wife to be and I were both awakened by the noise of some seals barking on the beach. We both sat up and watched as the seals splashed on the edge of the water, illuminated by the unseemingly huge, just-setting moon. As the moon settled down into the water, it left a brilliant streak of light across the waves, highlighting the beach just where the seals were cavorting right in front of us. Wow, what a moment! God, you made a beautiful world!

Forgive my reminiscence... I suppose I should get back to how a good road trip works.

Now of course one has to have a car for a road trip too. Preferably the car should belong to one of those on the trip, just in case something should happen to it. Also, if you borrow the big Lincoln Continental from "Uncle George," you won't be inclined to do as many crazy (but fun) things with it... like drive through bushes down to a beach. I always thought the best road trip car I ever went somewhere in was my roommate Tim's 1968 Old's Delta 88 Convertible. What a tank! It only got 6 miles to the gallon, but it could sit four across-Tim, two girls, and then me in front, and four more girls in the back! (I don't know if this would still work today. There wasn't a seat belt law back then, so road trips in the "purple bomb" almost always had 8+ people involved). Don't get me wrong though, you don't have to have a huge old convertible. I took one road trip through nine states and 3200 miles in a tiny little Honda Civic. We still had fun, cramped and all. On the other hand, I've been through several thousand miles in a camper, too, which certainly

### UMR loses its second straight game but Privett sets new field goal record

Matt Ryan  
Staff Writer

The football Miners were able to score their first points of the season on a record-setting field goal, despite losing to the Bulldogs of Northeast Missouri State for the 12th straight year. This was the one of the very few bright spots for the Miners, as they lost by a score of 63-3. The Miners fall to 0-2 this year overall, 0-1 in the conference, while the Bulldogs advance to 1-2.

Junior kicker Lance Privett provided a highlight with his record field

goal of 54 yards at 8:57 left in the fourth quarter, in order to make the score 49-3. Privett is a transfer from Culver-Stockton College in Florida, where he kicked for the last two seasons. He easily eclipsed his previous career best of 37 yards as well as the old UMR record of 49 yards, set in 1985 by Jim Zacny.

Once again the Miners were unable to produce enough offense to win a game. The Miner offense as a whole was only able to gain a total of 139 yards on 67 plays. Tailback Steve Hodson was a rare bright spot, gaining 41 yards on 11 carries in the first half. Hodson, a redshirt freshman from

Rolla, ended up with 73 yards on 22 attempts for the day. The passing game was unable to produce the yards needed, with only 50 yards for the day. The defense of Northeast Missouri, emotionally charged on their Parent's Day, was able to stop the Miners repeatedly on third down, as UMR was able to convert only 4 of 19 times. In short, the Bulldogs defense was able to contain the Miners at will, allowing only 3 points.

On the defensive side of the ball, the Miners fared even worse. Northeast was able to tie their school record of 9 touchdowns on the way to scoring 63 points. Jarett Anderson of North-

east had an incredible day, gaining 166 yards, scoring 4 touchdowns, and had a touchdown run of 56 yards. The Miners were outclassed both on the ground and in the air allowing a total of 632 yards, 431 rushing and 201 passing. Northeast was able to gain an average of 9.4 yards per play. Miners Ed Reichert and Brian Gilmore led the team with 11 tackles apiece, in an unsuccessful effort.

The Miners fall to 0-2 on the year. Their next game will be at Jackling Field this coming Saturday against Northwest Missouri State at 1:30 pm. This will be the Hall of Fame Day, so come out and support the Miners.

## Miner soccer receives first loss to go 3-1-1

This past week the Miner soccer team suffered its first loss of the season against Columbia College but were able to come home and defeat Central Methodist. In the game against Columbia College, the Miners outshot their opponent by 12-7. The Miner's advantage in shots on goal was countered by 8 saves by Columbia's goalkeeper. Brian Koscielski was the only Miner who was able to shoot the ball past Columbia's goalie. Despite having only 7 shots on goal and 5 saves by Miner goalie Kevin Levy, Columbia was able to score 2 goals which was enough to win the game.

The Miners once again outshoot their opponent. The Miners had a 21-9 advantage against Central Methodist last Saturday. Miner goalkeeper Kevin Levy had 6 saves and allowed only one goal while Gevan McCoy scored his third and fourth goals of the season with assists from Ryan Pape and Greg Schultz.

The Miners will take a record of 3-1-1 into Wednesday's game at 7:00 p.m. against MIAA foe Lincoln University.

■ Brian Sharp, Asst. Sports Editor

Ryan Shawgo

The Miner soccer team split a pair of contests during the week. The Miners now have a 3-1-1 record.

## Lady Miner soccer claims its first victories of the season

Ryan Shawgo

This past week, the winless Lady Miner soccer team was rebounded from an 0-4 start to move to a record of 2-4. On Wednesday the Lady Miners had their first win of the season over Central Missouri State University, 2-0. In the second half Natalie Sanders made the first goal of the game with an assist by Carrie Eyerluss. Anne Marie Cole scored another point for the Lady Miners with assists by Carrie Eyerluss and Amber Fischer. CMSU's goalie made 14 saves during the game, but the Lady Miner's 29 shots on goal and two goals were enough to win the game.

On Saturday the Lady Miners won again, this time against Central Methodist. Michelle Phillips scored her first goal of the season with assists by Amber Fischer and Carrie Eyerluss. Amber Fischer scored the second goal of the game with assists by Natalie Sanders and Stephanie Ingalls. With an assist by Tami Bowman, Alison Hanson scored her first goal of the season. Amber Fischer scored the final goal for the Lady Miners with an assist by Natalie Sanders. Fischer's two goals allowed her to break the UMR career scoring record, with 27 career goals. This record was formerly held by teammate Natalie Sanders and Susan Shrum, who played for the Lady Miners from 1983-1986.

Tuesday September 19, the Lady Miner's soccer team will be looking to move to 3-4 on the season when they visit William Woods College.

■ Melanie Claxton, Staff Writer

UMR's women's soccer team earned their first victories of the season this past week.

## Hockey: NHL pre-season Blues

Corey Schroeder  
Staff Writer

Many Blues fans this year are very unhappy with the changes coach-GM Mike Keenan has made. The biggest surprise of the year was the trading of All-Star winger Brendan Shanahan to the Hartford Whalers for defenseman Chris Pronger. On July 27, 1995, you could hear fans crying the blues throughout St. Louis because one of their favorite players was gone. Fans will always love Shanahan for what he did in St. Louis and maybe one day he will wear the Blue Note again.

Even though fans may not agree with the trade, Keenan feels Pronger will be a great asset to the Blues. Keenan believes Pronger will develop into the complete package, a big guy with skills like those of Larry Robinson. Pronger, 20, knows how

popular Shanahan was with Blues' fans and said, "I'm sure it will take time, but when the fans see what I have to offer, hopefully they'll come around."

Keenan made other trades during the off-season such as: Curtis Joseph to Edmonton, Steve Duchesne to the Ottawa Senators, and the acquisition of Shayne Corson from the Edmonton Oilers.

With all the new players the Blues picked up during the off-season they could make a run at the Stanley Cup Finals. There are many good teams this year but it appears as though the New Jersey Devils are the team to beat. They have one of the best defenses around, and are led by Stanley Cup MVP Claude Lemieux. It also looks like the high scoring Detroit Red Wings may very well be the other team shooting for the championship. Detroit will be trying hard to revenge last year's loss to New Jersey

## M-Club Athlete of the Week: Bob Etien

UMR Senior Bob Etien, is the M-Club's athlete of this past week by leading the men's cross country team to a first place finish on September 9th in Edwardsville, Illinois, at the Cougar Twilight Classic. Bob finished 5th out of 76 runners in the 6 kilometer race with a time of 20:19. Congratulations Bob!

Millions of dollars in scholarships, fellowships, grants, internships, work study programs and special student aid funds go unused every year because students simply don't know where to apply or how to get their share.

The secret in locating money for college, lies in your strategy. You need step-by-step information on what aid is available and how you can get it. The time to apply is now! You can apply as early as your junior year in high school, or during your undergraduate or graduate study. Aid can be used at any accredited college or trade school.

This Directory will provide information for Students or Individuals wishing or attending high schools, business schools, technical schools, graduate schools, law schools, medical schools, vocational institutions, undergraduate schools, research programs, and leadership programs.

Corporations, Trusts, Foundations, Religious Groups and other Organizations offer Scholarships, Fellowships, Grants, Internships, and Work Study Programs to students annually, regardless of grades or parents income levels.

## StuCo passes resolutions on Tuition and Federal Student Aid

StuCo  
Source

At their meeting on September 12, the UMR Student Council passed a resolution opposing any legislation that would reduce or restrict Federal Student Aid. Since approximately half of all full-time students in public colleges need federal financial aid, restrictions on Federal Aid will have an impact on quite a few students on the UMR campus. Restrictions to Federal Student Aid will make higher education less accessible. Reasons for opposing restrictions included the argument that student aid pays for itself by stimulating the economy, expanding the tax base, and increasing productivity, since college graduates place fewer demands on public funding. The text of this resolution is as follows:

There is currently federal legislation under consideration that would reduce the availability of federal student aid, while increasing the cost of loans to students. This legislation could impact Pell Grants, Perkins Loans, direct student loans, federal student loan interest exemption for graduate students, state student

incentive grants and numerous smaller scholarships and fellowships. One-half of all full-time students in public colleges need federal student aid.

**WHEREAS:** The changing political climate in Washington make the future of federal student aid unpredictable, and

Therefore, since student aid pays for itself by stimulating the economy, expanding the tax base, and increasing productivity, since college graduates place fewer demands on the public purse, and since the current legislation would make higher education less accessible, the UMR Student Council opposes any legislation that would reduce or restrict Federal Student Aid.

Respectfully submitted,  
Suzanne Lynch, Chair  
Public Relations Committee

At the same meeting, StuCo also passed a resolution opposing any tuition increases above the Higher Education Price Index (HEPI). HEPI is Higher Education's equivalent to inflation. The following is a copy of the resolution StuCo passed at their meeting concerning the possible tuition increases:

**WHEREAS:** The current five year plan has raised student fees \$200 above the Higher Education Price Index (HEPI) yearly, resulting in an 89% increase over five years, and

**WHEREAS:** The recent fee increases have brought UM System student fees above the mean student fee level of public AAU institutions, which is the comparison group for the University of Missouri, and

**WHEREAS:** Cost is increasingly the determining factor in a student's choice of institution,

**THEREFORE:** Be it resolved that the UMR Student Council opposes any increase in student fees above the rate of the Higher Education Price Index during the next UM System five year plan period, identified as 1997-2002.

Respectfully submitted,

Nancy Lambertson, Treasurer  
UMR-Student Council

These two resolutions will give StuCo more support when dealing with officials at the UMR level and at the University of Missouri system level. For more information, feel free to contact Student Council at 341-4280, stuco@umr.edu, or stop by 202 UC-West.

## Student Council raises money for Russell House

Karl Schmitt  
StuCo Source

On September 13th, Student Council took part in the Student Union Board's Campus Showcase. At Student Council's booth students had the opportunity to get back at a few well-known people on campus (including administrators, professors, and other students), while helping a local charity

organization. For \$1.00 students got three chances to "cool off" one of eight volunteers. Things started off slow but by midday things really picked up and over \$100 was raised for the Russell House of Rolla, which houses battered women and children in the Rolla area. Since this was the first time Student Council had tried something like this, it is believed that the event went over well and is worth repeating in the years to come.

Thanks to all of those who volunteered to be dunked and to those who participated in the dunking.

## Student Issues Report

StuCo  
Source

Yup, you've found it. Once again it's time for the Student Issues report, brought to you by Student Council. These are the issues that students brought up at the StuCo meetings and that StuCo is looking into right now:

**IMPROVEMENTS TO THE TRACK:** The question was raised as to what progress has been made towards resurfacing the track. For more information on how this issue is progressing, contact Mike Vincent (vincent@umr.edu).

**BIKING LANES ON CAMPUS:** The suggestion was made to investigate providing biking lanes on campus. This issue was investigated by the Campus Improvements Committee last year, at which time Physical Facilities informed Student Council that it was not feasible, but the issue is being re-investigated. For more information, contact Mike Vincent (vincent@umr.edu).

**"FACULTY ONLY" TIME AT THE MULTI-PURPOSE BUILDING:** A objection was made to the current "faculty only" night at the multi-purpose facility. For more information, contact Mike Vincent (vincent@umr.edu).

**CD-TO-CD COPIES IN THE LIBRARY:** A student complained they were not allowed to make a backup copy of a piece of copyrighted software they had purchased on CD-ROM. As there are potential legal ramifications of allowing the copy of licensed software, the library is not allowing any copyrighted software to be copied. They are investigating the legal issues and how to protect the University with the legal department. Based on their findings the Library will reconsider the current policy. For more information, contact Andy LeCren (alec@umr.edu).

**WE NEED MORE CAMPUS DIALUPS:** Once again, usage of the dialup lines has increased. Computing Affairs has asked Computing Services to install more modems by the end of the semester. For more information, contact Andy LeCren (alec@umr.edu).

**CIVIL ENGINEERING COPY MACHINE:** A request was made for Student Council to investigate obtaining a copy machine for the students in the Civil Engineering Building. Currently, students are charged \$.25 a copy to use the machine in the building. A request has been filed with the External Funding Committee of Student Council asking for the funds to purchase a copy machine for the students. For more information, contact Phil Gong (gong@umr.edu), Gary Ross (gaross@umr.edu) or James Cain (jcain@umr.edu).

**PHOTOCOPIES IN THE LIBRARY:** A complaint was voiced about the cost of copies in the library. Copies are currently \$.10/each, or \$.075/each with a vendacard. For more information, contact Rich Lee (rlee@umr.edu).

**RAYL CAFETERIA:** A student complained that the overall quality of the food served at the Rayl has decreased since last year. For more information on how this issue is progressing, contact Rich Lee (rlee@umr.edu).

Resolved Issues

**WEATHER STATION BY STONEHENGE:** A complaint was voiced that the weather station recently installed by Stonehenge detracts from the appearance of our campus. Physical Facilities was contacted, and they reported that because of wind currents and various other natural phenomena, the only practical location on campus for the weather station was by Stonehenge. For more information, contact Mike Vincent (vincent@umr.edu).

## StuCo supports networking

The UMR Student Council passed a resolution on September 12 supporting UMR in its efforts to newtork University approved housing. The text of the resolution is as follows:

**WHEREAS:** The main objective of the Academic Computing/Information Technology Plan for 1995-2000 is "the access to academic computing must be increased and that the integration of computing into UMR's instructional and research programs must be accelerated," and

**WHEREAS:** The University has begun the process of networking University approved housing, and

**WHEREAS:** It would provide valuable computing services to a majority of UMR students,

**THEREFORE:** Be it resolved that the Student Council of the University of Missouri-Rolla urges the University to establish network connections to all University approved housing by the year 2000.

For more information on this resolution, contact Student Council at 341-4280, e-mail stuco@umr.edu or walk up to 202 UC-West.

## No such thing as a free lawyer?

StuCo  
Source

Are you confused about a legal matter? Do you need some sound legal advice? If so, Student Council provides free legal services to all UMR students. Stop by the Walnut

Room in UCE at 2:30 p.m. on any of the following dates:

September 20 and 28,  
October 4, 12, 18, and 26,  
November 1, 9, 15, 29, and  
December 7,

for FREE legal advice from an area lawyer. No reservations necessary, services are provided on a first come - first serve basis.

Questions??? For more information, Contact StuCo at stuco@umr.edu, 341-4280, or stop by 202 UC-West.

## StuCo to vote on allocations

James Cain  
StuCo Source

month. The vote on the Non-Varsity Sports Appropriations (roughly \$25,000) will be September 26th and the Club Appropriations (approximately \$15,000) will be October 10th. Both meetings will be in 204 McNutt at 6:30 PM and will be open to all students. For more information, contact James Cain (jcain@umr.edu) or Student Council at 341-4280, stuco@umr.edu or stop by 202 UC-West.

# Greek Week

**Zeus**  
Ross Thomasson

Zeus 1995, Ross Thomasson, ruler of all Godz, is from Pi Kappa Alpha Fraternity. Ross is a senior in Electrical Engineering with a g.p.a. of 3.83. At Pi Kappa Alpha, Ross has served as Vice-President, Risk Management Chair, Social Chair, and Pledge Class President. With IFC, Ross has served as Treasurer, Greek Sing Chairman, and Games Chairman. Also, he has been Secretary of Tau Beta Pi and Eta Kappa Nu.

As the ruler of the world, Zeus roars, "Hey Baby, you're cute, wanna wrestle?"

**Dionysus**  
David Ferkel

Dionysus, the god of fertility and the vine for Greek Week 1995, is being represented by David Ferkel of Beta Sigma Psi. Dave is a senior in Chemical Engineering. He has served as Judicial Board Chairman, and also ran Mugs/Greek I.D.'s. As a member of Beta Sigma Psi, he has served as 1st Vice-President, Steward and most recently President.

Dionysus served to liberate the emotions and to inspire men with joy. Like the grapevine, he suffered death, but was resurrected. His female worshippers were the frenzied Maenads. He is also known as the god of drunkenness.

When asked what he thinks about his position, Dionysus said, "Vine of Fertility? Well, there you have it!"

**Kottus**  
Steve LeFors

Kottus for Greek Week 1995 is Steve LeFors from Kappa Sigma Fraternity. Steve has served Kappa Sigma as Second Vice-President, Outer Guard, and Rush Chairman. As a member of the Interfraternity Council he served as Carnival Chairman.

The legend states that Kottus and his brother, Gyes, protect Mount Olympus from intruders. When asked how he plans to handle this monstrous responsibility, Steve replied, "Not a problem. We're cold-kickin' it old school!"

**Hermes**  
Craig Puder

Hermes 1995, the messenger of the Godz, is Craig Puder. Puder is the Vice-President of the IFC and currently an active member of Alpha Epsilon Pi. Craig has been Treasurer for Alpha Epsilon Pi and an active member in IEEE. Craig is the third generation Hermes for Alpha Epsilon Pi.

Hermes is the god of speed and agility, wealth and good fortune, and lover of men. When asked about his time as Dad, all he said was, "Hey Dad, forget what I said last year! We're in control."

**Artemis**  
Rachel Daugherty

Rachel Daugherty, originally from Shawnee Mission, KS, is the daughter of Bob Daugherty and Debbie Lumpkins. She is a senior majoring in psychology. She has served as IFC liason, PR historian and was baby rep of the year. As a member of Zeta Tau Alpha, Rachel has held the positions of membership chairman, assistant membership, sisterhood chairman, and activities/green.

"When the Wuss-guard is gone, Artemis must find other wild animals to tame."

**Uncle**  
Steve Dumortier

Steve Dumortier, from Kansas City, Missouri, son of Steve and Charline, is currently a fifth-year senior in Chemical Engineering. He is a member of Sigma Phi Epsilon and has served as Steward and Jr. Marshall within his house. In addition to his position as Uncle, he is also currently Historian for the IFC.

"After four years of rugby, handling the Godz will be cake."

# Godz

**Poseidon**  
Travis Lynch

Ruler of the seas, Poseidon 1995, is Travis Lynch. Travis has served as secretary and fields chairman for the IFC. He is a member of Kappa Alpha Order. Travis has been Kappa Alpha's ritualist and house manager. Travis plans to graduate in December with a degree in Civil Engineering. When asked about the other Godz, Travis believes, "It takes a big dog to weigh a ton but only one Gyes."

**Athena**  
Shannon Neimeyer

The saving grace of the Godz, Athena 1995, is Shannon Neimeyer. Shannon is the daughter of Phil and Donna Neimeyer and resides in Kansas City, Missouri. She has served the Panhellenic Council as Vice-President, Programming and Achievement Chairman, and Sorority Relations Chairman. As a member of Chi Omega, Shannon has served as Rush Chairman, Social Chairman, and Informations Chairman. She is also a member of Tau Beta Pi and Phi Eta Sigma. Athena is said to be the virgin goddess of wisdom. She is also a goddess of the arts and guardian of Athens.

Athena had this to say, "Artemis and I are in charge of this week! Goddesses RULE!"

**Hades**  
Larry Lapinski

The lord of the underworld, Hades '95 is Larry Lapinski of Tau Kappa Epsilon. Larry has served as vice-president, and has held the offices of secretary and house manager of Tau Kappa Epsilon fraternity. Also he is a member of Theta Tau Omega. Because Hades is the best looking brother of Zeus and Poseidon, he was forced to rule the underworld.

Hades says, "I don't have anything nice to say, so I'm not going to say anything at all."

**Gyes**  
Cory Hunsley

Gyes for Greek Week 1995 is Cory Hunsley from Acacia. Cory is a senior, majoring in mechanical engineering. Cory served as the Judicial Board Chairman and served as the Queens committee chairman in the Interfraternity Council. In the Acacia fraternity, he served as Senior Dean, historian, and various offices throughout the house, he currently holds the office of House and Grounds.

According to the legend, Gyes, also known as Gyges, is one of the Hecatonchires, the 100-handed giants. Along with his brothers Kottus and Briareus, they are the personal body guards of Zeus. Gyes says, "With a hundred hands, and if each hand is 2cm thick, it would only take 25 of them on top of each other, to be as tall as Poseidon!"

**Dad**  
Zephiron Wester

Dad is the keeper of the godz. Dad for Greek Week 1995 is Zephiron Wester. Known only as Zeph, Dad is now a Junior Representative in the IFC. He is also a junior majoring in Engineering Management. As a member of Lambda Chi Alpha he has served as Internal Vice-President.

Dad's quote to all, "Ultraviolence..... I mean @%#&, Ray!"

**Hephaestus**  
Jeff Ostermann

Hephaestus, god of fire, is Jeff Ostermann. Hephaestus was born disfigured and was thrown from Olympus into the sea. There he learned how to make jewels and crafts. To regain his title as a god, he made a beautiful throne for his mother Hera, but when she sat on it chains surrounded her. The Godz then praised him as a god to free her. Jeff is a member of Sigma Pi where he has served as Vice President. As a member of the IFC he was Treasurer, and has also served as Sales Chairman. Hephaestus says this: "I may be ugly, but at least I'm not country."

## The Student Fee Task Force: What is it?

Keith Blackford

Source

Many students have recently been discussing the Student Fee Task Force, which will be setting the plan for student fees during the years 1997-2002. The plan for the next five year period is being set this fall, but what are the stipulations of the plan that we are currently following?

The increase over the current five year period has been quoted at levels ranging from 87% to 89% over the course of the five years. However, the actual method for determining the increases is more complex than a flat percentage increase per year. The yearly increase for resident undergraduate fees is the amount of the increase in the Higher Education Price Index, (HEPI) plus \$200 per year. HEPI is the university counterpart to the Consumer Price Index and is explained as a measure of inflation for universities. In the past, HEPI has been above the CPI, which is the most often-quoted inflation rate. In recent years, HEPI has been in the range of 4 to 6 percent, but has risen as high as 10 percent in the early 1980's.

The current Five Year Plan was finalized in 1991. In December 1989, the curators set aside the student fee

policy adopted in 1985. The 1985 policy had called for annual increases in student fees which would closely approximate the expected increases in HEPI. In the spring of 1990, then UM President C. Peter Magrath appointed a Student Fee Task Force consisting of students, faculty, and staff to investigate the issue and recommend a fee policy to the Board of Curators.

The Task Force reported back that while the state of Missouri was a low support state in terms of its support of higher education, the University of Missouri set fees at a low level relative to comparable public institutions. It recommended that the university adopt a policy of moderate tuition rather than the low-tuition policy of the past several years. The Task Force further found that financial aid for needy students was a responsibility of the state and additional fees from students should be used only to enhance the quality of educational programs. Other findings of the group included that undergraduate fees on a campus be kept as uniform and simple to understand as possible. It was recommended that resident undergraduates pay approximately one third of the total cost of their education, and that non-resident undergraduate fees be set at approximately three times the amount of the resident fee. This level was to be reached by increasing tuition at the annual rate of HEPI plus \$200.

There were many factors affect-

ing the decisions of the 1991 Task Force. The university had a backlog of deferred maintenance. In short, the university, when left short of money in the 1980's, would reduce maintenance of buildings in order to fund more vital functions, such as teaching and research. Equipment replacement had also been delayed during tough fiscal years, and new equipment was needed. Also, the level of faculty salaries had fallen below the average of comparable institutions. In addition, a substantial increase in university-funded student financial aid was to be funded from the increase in fees.

The factors facing the current Student Fee Task Force are different. In the first meeting of the current Student Fee Task Force, UMC Chancellor Charles Kiesler outlined several challenges facing the Task Force. The money spent on unfunded federal mandates has increased dramatically in the past decade. Also, the current Task Force will address need-based financial aid to a greater degree. Another issue is whether the University should subsidize programs based on state needs and whether to base any fee increases directly from HEPI, or to determine an optimum level cost for students to pay.

To find out more about this topic, students can visit the Student Council office and attend the Student Fee Action Team meetings every Thursday at 7:30p.m. in the Missouri Room of UCE.

# NOT ALL GOOD THINGS MUST COME TO AN END.

CHANGE BEGINS WITH YOU.

## Aid

Students are reminded that RESUMES ARE NOT AUTOMATICALLY SUBMITTED BY THE COC to companies for pre-screening for on-campus interviews. Each student must submit their own resume through the system to each company in which they are interested.

### STUDENT FINANCIAL AID

For more information and/or applications pertaining to the following scholarships, contact the Student Financial Aid office, G-1 Parker Hall.

There is a new service the Admissions & Student Financial Aid Office is offering on the World Wide Web called FASTWEB (Financial Aid Search Through The Web). Its location on the web is "http://web.studentservices.com:80/fastweb/".

FASTWEB is a freuser-friendly service in which a student completes an online personal profile pertaining to his biographical information, including parent/student activities, background, and college/major information.

Upon completion of this profile, FASTWEB begins its search, and

within minutes the student is presented with a detailed online list of outside grants, scholarships, fellowships, internships, and loans he is eligible to apply for. Approximately 1200 new awards are added to the FASTWEB database each day. FASTWEB automatically updates each student's profile based on these new awards. FASTWEB also provides a general information section describing various Federal Student Financial Aid programs.

Students are encouraged to use FASTWEB to learn more about financial aid and keep abreast of eligible awards.

### MARGUERITE ROSS BARNETT MEMORIAL SCHOLARSHIP

Additional funds are available for the 1995-1996 academic year from the Marguerite Ross Barnett Scholarship program. To qualify, a student must be 18 years of age, employed more than 20 hours a week, be a U.S. citizen or permanent resident, be a resident of the state of Missouri, be enrolled as a part-time student, and be in need of financial aid.

Applications are available in the Financial Aid Office, G-1 Parker Hall, through October 13, 1995.

### RURAL MISSOURI, INC.

If you have been employed as a farmworker in the past two years, you may be eligible to receive free tuition assistance for your education. If you have worked as a farm, orchard, greenhouse or poultry/egg production employee, you may qualify. To obtain details and the field representative closest to you call 1-800-234-4971.

### ROLLA AREA BUSINESS AND PROFESSIONAL WOMEN SCHOLARSHIP

The Rolla Area Business and Professional Women's Club is offering two scholarships of \$500.00 to women enrolled for the 1996 Springs semester. The scholarship is designed to encourage women to advance their career goals through continuing education -- whether they are currently pursuing a degree, returning to the work force after a long-term absence, or are in the process of changing careers.

ELIGIBILITY REQUIREMENTS FOR SCHOLARSHIP:

\* Must be a women 25 years of age or older and a citizen of the U.S., and a resident of Phelps, Dent,

Maries or Pulaski Counties.

\* Must be officially accepted into an accredited program or course of study at a United States institution.

\* Must demonstrate need for financial assistance to upgrade skills or complete education for career advancement.

\* Must have definite plans to use the desired training to improve chances for advancement, to train for a new career field, or to enter or re-enter the job market.

APPLICATIONS AVAILABLE IN THE STUDENT FINANCIAL AID OFFICE, G-1 PARKER HALL. DEADLINE MUST BE RECEIVED

BY THE SCHOLARSHIP SELECTION COMMITTEE NOT LATER THAN SEPTEMBER 30, 1995.

### CRANE FUND FOR WIDOWS AND CHILDREN SCHOLARSHIP

The Admissions/Student Financial Aid Office wishes to make students aware of the Crane Fund for Widows and Children. This program is: \* for needy and deserving widows and children of men, who at their death, have left their widows and children without adequate means of support or

\* deserving wives and/or children of men upon whom they are dependent

for support but, because of age or other disability, are unable or for other reasons, fail or neglect adequately support them respective wives and/or children.

If you meet the above terms for this program you must complete a Crane Fund for Widows and Children Application to be considered for funding.

Applications can be received in the Student Financial Aid Office, G-1 Parker Hall. Applications for this program for the 95/96 academic year will be accepted through September 30, 1995.

### 1995 NATIONAL HISPANIC SCHOLARSHIP FUND

The purpose of National Hispanic Scholarship Fund (NHSF) scholarship is to assist Hispanic American students in completing their higher education. NHSF scholarship are available on a competitive basis to undergraduate and graduate students of Hispanic background. Awards normally range from \$5500

from page 2

# Can you imagine Lady Liberty on Staten Island?...Intoxicating.

Fortunately, to most of you this smelly landfill is not familiar. But with each person in the United States producing 4 pounds of garbage per day, you will be forced to deal with the hazards of a wasteful, throw-away society.

## It Doesn't Disappear

Once it's taken off your curb, your garbage just doesn't disappear, as Fresh Kills landfill on Staten Island testifies. It is the world's largest landfill, covering an area the size of 3,000 football fields. Nearly 80% of the nation's garbage is dumped in landfills. The idea that much biodegradation occurs is a myth; you can still read newspapers that were buried 37 years ago. Up to 80% of this waste can be recycled, but only 10% is being recycled. Recycling not only decreases waste, but also turns waste back into useful products, conserving natural resources and energy.

## Recycle It Away

One-third of all the nation's landfills will be closed within the next 5 years because they have reached capacity or have become dangerous, producing a toxic liquid called leachate, which contaminates your drinking water. Recycling will prevent the increase of large, smelly landfills and keep your water clean and pure.

Recycling also preserves natural resources and the quality of life you enjoy. Paper, which makes up 36% of waste, can easily be recycled instead of harvesting millions of trees. America

cuts down 2 million trees a day. If everyone recycled Sunday newspapers, we'd save 500,000 trees every week. Recycling aluminum conserves 90% of the energy it takes to make new aluminum products. Every year Americans throw away enough aluminum to rebuild the entire American air fleet 71 times over.

The good news is you can eliminate the hazards of a wasteful, throw-away society by obtaining information and by recycling. Recycling is easy once you and your children change your habit of tossing everything into the garbage can. Saving paper and aluminum products takes you an average of only 2 minutes per day. Your small efforts will have great consequences. By recycling 2 months' worth of paper you save 20 trees. By recycling one aluminum can you save enough energy to run your TV set for 3 hours.

Become informed. Take action. Recycle. Preserve America by calling the Alliance for Environmental Education at 1-800-"Liberty" and find out more ways to reduce your waste.

**Recycle...**  
**it's your liberty.**

## Aid

to \$1000

### ELIGIBILITY REQUIREMENTS:

\* You must be a United States citizen, or a permanent resident of Hispanic parentage, who has completed at least fifteen (15) units of college work in the U.S. prior to submission of this application. You must also be enrolled in college for the Fall 95 and enrolled and in attendance through the Spring of 1996.

\* Applicants are expected to be attending an accredited college or university in one of the fifty states or Puerto Rico as full-time, day-time students. A full-time undergraduate student must be carrying a minimum of twelve units. A full-time graduate student must be carrying a minimum of six units. Students must be enrolled in programs eventually resulting in a baccalaureate or higher degree.

\* Current graduate/professional school eligibility limits applicants to fields beyond the baccalaureate level. Generally, these students are attending traditional universities that enroll both undergraduate and graduate students.

\* Community College applicants must be enrolled in majors transferable to four-year institution offering a baccalaureate degree. Of the community college units completed, fifteen (15) must be transferable.

\* Due to limited resources, NHSF is unable to make awards to fully

employed persons, practicing professionals, students pursuing second degrees, or others pursuing an education through extended day, night school, part-time, special weekend, or other non-traditional degree programs.

### APPLICATION PERIOD AND DEADLINE:

AUGUST 15 TO OCTOBER 1, 1995, Postmarked by October 1st insures acceptance.

FOR INFORMATION AND APPLICATION CONTACT DEAN BAYLESS, 101 ENGINEERING RESEARCH LAB.

### PETER D. COURTOIS CONCRETE CONSTRUCTION SCHOLARSHIPS

Two \$1,000 (U.S.) awards are available through the ACI Concrete Research and Education Foundation (ConREF) for undergraduate study in concrete construction for the 1996-97 academic year. The Peter D. Courtois Concrete Construction Scholarships honor the memory of Peter D. Courtois, whose long-term commitment to practical achievements in construction focused on the fields of formwork and tilt-up construction.

### REQUIREMENTS:

These awards are open to any undergraduate student in the United States or Canada. The student shall have achieved senior status in a four-year or longer undergraduate program in engineering, construction,

or technology during the year for which the awards are presented. The awards will be made on the basis of demonstrated interest and ability to work in the field of concrete construction.

\* The student must have a course load of 6 or more credit hours each semester during the period for which the award is made.

\* The student must be a senior during the year for which the award is made

\* Transcripts, recommendations, and an essay must be submitted as outlined on the application form.

APPLICATIONS AVAILABLE FROM THE STUDENT FINANCIAL AID OFFICE, G-1 PARKER HALL OR BY CONTACTING ACI CONREF, P.O. BOX 19150, DETROIT, MI 48219-0150. APPLICATION DEADLINE MUST BE RECEIVED IN DETROIT NOT LATER THAN JANUARY 15, 1996.

### STUDENT RESEARCH AWARD - COMMITTEE 228 ON NONDESTRUCTIVE TESTING OF THE AMERICAN CONCRETE INSTITUTE 1996

ACI-JAMES INSTRUMENTS STUDENT AWARD FOR RESEARCH IN NDT OF CONCRETE One \$800 (U.S.) award is available through ACI Committee 228 on Nondestructive Testing for original and innovative research in the field of nondestructive testing of concrete. The ACI-James Instruments Student

Award is sponsored by James Instruments, Inc., a Chicago-based manufacturer and distributor of NDT systems for concrete. The award also consists of an engraved certificate an ACI membership for one year, regular or student membership, as appropriate.

### REQUIREMENTS:

\* Research work shall be original and performed by a student while enrolled in a degree program, graduate or undergraduate, at an institute of higher education.

\* Research should be on a topic related to NDT of concrete and must focus on or possibly lay the foundation for the development of an NDT method for concrete.

\* Applicant need not be enrolled at the time of submission but the work must have been completed within two year of the date of submission.

\* Applicant must be the primary author of the paper submitted. The paper must be in the form of a technical paper conforming to the Applicants must submit the application along with a UMR transcript and essay explaining why you feel you deserve scholarship consideration.

\* Selection will be based upon academic achievement, leadership qualities, and financial need. APPLICATIONS AVAILABLE AT THE MINORITY ENGINEERING PROGRAM (MEP) OFFICE, 107 NORWOOD HALL AND THE STUDENT FINANCIAL AID

### OFFICE, G-1 PARKER HALL.

Completed application and UMR transcript must be returned to either the Minority Engineering Program (MEP) Office or Student Financial Aid Office.

### DEPARTMENT OF THE ARMY U.S. ARMY HEALTH PROFESSIONAL SUPPORT AGENCY.

Let the Army pay your pay through Medical, Dental Optometry School, or a Doctoral level degree in Clinical/Research Psychology. Scholarships includes: Full tuition, Required books, lab fees, required equipment rental, \$865.00 Monthly Stipend.

FOR MORE INFORMATION ON ARMY SCHOLARSHIP OPPORTUNITIES CONTACT: CAPTAIN DINO L. MURPHY OR MRS. SHARON MACKENZIE AT 1-800-829-0924.

### AMERICAN SOCIETY OF HEATING, REFRIGERATING AND AIR CONDITIONING ENGINEERS, INC. FOR UNDERGRADUATE AND GRADUATE STUDENTS.

Applicants for either program should be involved in the heating, ventilation, air conditioning or refrigeration (HVAC&R) fields or in related areas. These may include indoor air quality, energy conservation, human comfort or HVAC system design, operation or maintenance. For more information and applications contact the Student Financial Aid Office, G-1 Parker Hall. Application Deadline: December 15, 1995.

from page 16

## New radio station in Rolla

Casey Morriss  
Staff Writer

UMR students and anyone within a 50 mile radius of Rolla now have a new choice on the radio dial. KDAY 97.5 FM held a block-party Saturday, September 16, on Pine Street between 9th and 10th streets to kickoff their station's broadcast. About five hundred people were on hand as the new station gave away T-shirts, frisbees, stickers, cokes, and Pizza Inn pizza. There was also a drawing held for a Sony home stereo system. At noon, KDAY's mascot, "Thunder Duck," flipped the switch that powered up the station and sent fireworks and helium balloons soaring over downtown Rolla.

According to Donna VanLier, chief operating officer at KDAY, the new station will broadcast an adult contemporary format targeted at a wide spectrum of listeners, from teenagers to "forty-somethings." "We want to play music that the whole family can enjoy. Music that teenagers and their parents can listen to when they're in the car together," VanLier said. According to VanLier, the adult contemporary program is something new for the Rolla area. It ranges from Amy Grant to the Gin Blossoms.

KDAY is owned by a national corporation called Eikon Marketing, but is operated by people in the Rolla area. "Our mission is to be an extension of the community," VanLier said. "We want to be very community involved and plan to do regular remote broadcasts from area activities."

KDAY operates 24 hours per day and can be found at 97.5 FM.

## Crime on Campus: Theft is on the rise

Roy Jacobs  
Staff Writer

Theft is up at UMR and University Police are asking students to be aware of their belongings at all times.

Among the suggestions the UMRPD is offering is to keep your bookbags with you at all times. A loss of a bookbag could total over five-hundred dollars if you were to have your Calculus, Physics and Chem books along with a HP calculator in it.

Students are encouraged to put a special mark somewhere on a page and make a note of that mark. If your book bag is stolen immediately report it to UMRPD and then notify the

bookstore. Together they can catch the person who stole it when they take the book to the bookstore to sell, the employees will then check the book or books that you have reported stolen for your special mark. After buying your HP calculator have your name inscribed immediately on the back. This can deter a thief, even though the plate can easily be removed it is better than nothing.

If you live in a dorm room keep your door locked even if your going next door for a moment to get class notes from a friend. It just takes one second for some thief to walk by your room and see a billfold that may contain money and credit cards.

Keep your student ID on you at all times in case a security guard or University Police asks to see it when

University Police also ask that you know the hours of the CLC that you are working in. Just because the

building isn't locked or no one has ever asked you to leave because the lab was opened does not mean you have the right to be there. It is the students responsibility to know the hours of operation of any CLC or building the he or she is in. If you don't know check with the department office that the lab you are working in. If it is late at night you may call University Police. They have an up-to-date list of all the buildings and CLC hours.

If you are found in a building or CLC without the proper authorization you will be asked to leave and you will be given a "Notice Of Trespassing." If you are found again unauthorized in a building or computing lab during closed hours you will receive a summons for Trespass in the first degree, as well as a disciplinary sanction from the university.

## UMR nationally ranked for engineering

Andrew Tate  
Staff Writer

According to the September 18th edition of U.S. News & World Report, the University of Missouri-Rolla has one of the best undergraduate engineering programs in the United States. In this issue, which appeared on newsstands Monday, Sept. 11, U.S. News ranked the top fifty undergraduate engineering programs in the nation. At the top of this list is the Massachusetts Institute of Technology and Stanford University (both tied for number one). The University of Missouri-Rolla is tied for number 46 with eight other schools, one of

which is Washington University in St. Louis, the only other school from Missouri on this list.

Chancellor John T. Park is excited about the recognition that this is sure to bring to UMR "This is great news for our campus," said Park. "To be listed as one of the nation's finest engineering programs is a wonderful recognition." "We've continued to focus our efforts on providing the best undergraduate engineering education possible for our students, and this recognition is another indication that we are achieving this goal," Park added.

UMR was also among last year's top fifty "best buys" in the United States according to U.S. News. UMR is listed in U.S. News' "best college values" list. The edition with this listing appeared on newsstands Monday, Sept. 18.

# The Miner Music Review

Jeff Daniels

Music Reviewer

I hope we are all making it through our first round of tests. There is nothing better to take your mind off of that nightmarish Heat Transfer test than a little musical enjoyment. You could pop in your favorite classical cd and let those test anxieties drift away. If that doesn't work, try taking out your aggression with White Zombie. It is much easier than climbing to the top of the smokestack with a high powered rifle and picking off your profs. In my case, I like to listen to a nice, depressing blues cd: hearing about someone else's troubles seems to make mine seem not as bad. That is why I'm reviewing a cd from one of my favorite blues performers, Albert Collins.

Albert Collins  
Live '92/'93  
Pointblank Records

Performance 6  
Sound Quality 5

As many of you may or may not know, the world of blues music has had something missing for a few years. Albert Collins, the "Master of the Telecaster," passed on in late 1993, after a fight with cancer. He left a legacy of music that will keep him "alive" in his fans for many years to come. Okay, enough of the background: it's time for the review.

This cd is a collection of ten songs recorded during Albert Collins' final live performances in 1992 and 1993. If I had just listened to the cd without a time reference, I would have been disappointed at the quality. On the other hand, if someone had told me when this music was recorded, I would be --and am-- awed at the strength of this man and his dedication to the blues to continue doing live performances when he knew he only had a few months to live. That point really should not matter much when reviewing music, so I will ignore the facts surrounding the recording and give it a fair review. I am

a big Collins fan and these recording as a whole are not up to his normal excellence achieved in his studio recordings. It is one of those intangible qualities that is lacking; the songs seem to be lacking some of the energy that Albert normally puts forth. This is not true of all of the songs: I'm very happy with two of them, "Lights Are On But Nobody's Home" and "Frosty." "Lights Are On But Nobody's Home," --what a great title-- is a great slower-blues number. "Frosty," a Collins' classic recorded on this cd, is an extra-long version. He used this song to introduce the rest of the band during the concert, so there are a lot of great solos. These songs were recorded in 1992, which could be the reason that they have more energy. I have one more beef with this cd. It is a problem that I have with almost-live cd's, and that is low sound quality and background noise. The recorded sound quality is good on this cd, but there is often annoying crowd noise, especially on the slower songs.

Albert Collins is a great musician, and I hope this not-so-good review will

not scare you away from his music. I would suggest either Cold Snap, or Showdown. Both are excellent studio recordings. I'll finish with a quote from one of Collins' most famous songs, "T-bone Shuffle."

"You can't take it with you, that's one thing for sure

Ain't nothin' in this world, woman, that a little old Collins shuffle can't cure."

J. Daniels

Frank Zappa  
Strictly Commercial

Performance 9  
Recording 7-10 (depending on year, equipment, etc.)

In this world of infinite intricacies, much remains beyond the boundaries of human capacity. Notable examples of such phenomenon include finding square corners in round rooms, and designing more functional mouse-traps. Also inherent to the category of impossibility is the task of compiling the "best" selections of late composer/

musician/free speech superhero Frank Zappa. Zappa released nearly 60 albums in his 27 year career. And if the sheer volume of his quite remarkable portfolio isn't enough to condemn the would-be compiler to a lifetime of frustration, the fact that Zappa's musique encompasses an amalgam of aural styles ranging from rock to full orchestral compositions certainly must.

In conciliation, the fun folks at Ryko records have recently released this 19 song retrospective of Frank singles designed to "scratch the surface" of your Zappa itch.

Although often noted and/or discounted for his humoresque approach to contemporary music, the depth of uncle Frank's well runs deeper than most relationships. For instance while a surface listening of "Don't eat the Yellow Snow" may reveal Nanook's epic tale of vulgarity, beneath the ice flows a glacier of interwoven musical structure. Similarly, while one may be carried passively through the one-liner world of the "Valley Girl," the audio

## Meeting of the Minds

Silence falls over the make-shift tournament hall. The collective concentration can be felt in the air. A small crowd gathers around one table in the corner. Two young men wearing ball caps stare intently at a game board and at the familiar king's court. Those who have congregated around the table are one with the game. The game is chess.

At five o'clock the meeting of the minds began for the fifth and final game of the two day tournament. After several hours of silence two champions emerge. This year's fall tournament ended in a tie between James Blackman Dent and Mustafa Zvolensky.

Dent was available for comment after the event and said that he has been seriously playing chess for two years. Dent was surprised when he got to the final game and excited when he won. "I was really impressed by the turn out here. There are a lot of very strong quality players," he said.

The UMR Chess Club is a new club on the campus which was started last April by a young Turkish student

named Bugra Cankaya, who had only been in the country for a few weeks. The club, which started with a handful

of members, has grown to nearly 40 members.

This rapid growth and interest in the game is part of chess history. Chess, called the game of kings, probably originated in India as a religious board game called Chaturanga.

The first written account of chess was in a Persian romance in 600 A.D. By the year 1000, the game of chess was widely known across Europe and was beginning to look like the game we play today.

Josh Skaggs, official spokesman for the chess club, said that tournaments help spur interest in the club.

Club president Arnold Wilkes (right) challenges spokesman and organizer Josh Skaggs to a game of speed chess

Skaggs said, "Being part of the chess club allows you to participate in any campus tournaments for free and to participate in the weekly competitions and club meetings that are held."

What about beginners? "We wel-

come beginners and are planning a special program to teach them about chess in the near future. I think the key

benefit of the chess club is being able to meet people of similar interests." Skaggs also said that the club is not limited to just UMR students and that there are many non-student members. M i d e Nitzband, one of the

veteran chess players, hopes that the growth of the chess club will continue to involve the local Rolla chess players as well as UMR students. Nitzband also said, "I was pleased with the turn-out and the competition."

The president of the chess club, Arnold Wilkes, looks forward to the next tournament and the future of the chess club. He said, "In the future, we are hoping to get a team together to compete against other schools. Our first goal, though, is to build up our membership." Wilkes continued, "The tournament went very well and the turn-out was great."

If you would like to join the UMR Chess Club the annual dues are \$5. Members will receive information on future tournaments and will be able to participate in weekly games and the campus tournaments for free. The organization is young. All who are interested in chess are encouraged to join. For more information on how to join and the meeting times, call Josh Skaggs at 314-364-7011 or Email David Savage, vice president, at savage@umr.edu.

## Calc, Phys, and History?

Yes, Virgil/Virginia, there are Liberal Arts Majors at UMR. We are a small but steadily growing group. One evidence of this is the number of liberal arts classes being held in buildings other than the History/Social Sciences building.

Why does a technical university need liberal arts in the first place? You may well ask that question, and you deserve an answer.

Can you say r-e-a-l-w-o-r-l-d? Suppose you have sweated through your nuclear engineering program. You have snagged that job with the Corporation. You are enjoying the fruits of your education: money, satisfaction, fulfillment of all your dreams.

You are invited to the cocktail hour at the boss's house. Conversation will center around the Job, the Present Project, and you are going to get some idea of Up-Coming Projects you really want to work on... WRONG!!

You are going to converse with the boss's wife, department heads other than your own, other first-timers. Man, what was it that speech instructor tried to point out? Man, like, I need to speak

English to these people. Mr. Number Two studied at the Sorbonne. Is that France? Venice or Paris, France?

Current events you can handle, right? You catch the news on television. The Bosnian crisis is something you know about. Do we support one side or the other? Then somebody throws in the phrase "...Balkan question was part of WWI and WWII." Now, what was it I remember from Western Civ.?

You get the picture. What you as a potential guest at this potential gathering need is a good foundation of basic knowledge in English, history, communications, the arts. Don't fool yourself into believing ALL you need to know is Your Field.

The purpose of this column, and future columns, is to convince you to take advantage of the tremendous opportunities you have to get prepared for that r-e-a-l-w-o-r-l-d. UMR is providing us some outstanding instructors and professors in all areas pertinent to creating well-rounded graduates. Don't fall for the idea that all you need is to "know your degree."

ions in the mind: "How often do people talk about me? How many people have had a good laugh over some of my habits? How many people have sacrificed my self-esteem for their passing pleasure?" All of this leads to insecurity, distrust, and cynicism.

Few people would claim such results are healthy, but we continue to

down-trod others all the same. Why? Before you head out for classes, meetings, practices--whatever--think about when YOU suffered an insult. Think about your pain. A seemingly innocuous remark is all it takes to effect permanent damage. Remember *your* pain before releasing *more* pain.

email: dare@umr.edu

## from page 5

it, not just to "be different" or to be a 'non-conformist," but because they are mature enough to know the difference.

10-give-up. If you're smart enough to go to school here, you're smart enough to graduate from here. A 4.0 would be wonderful, as we all know, but a life lived only for the grade is a life only half-lived. I greatly envy all those brilliant people out there who can make the grade and have as much of a life as is possible in this town. Not all of us can do it. But we each have our own talents and gifts, and that means a lot. A whole lot.

Well, kiddies, there you have it. I hope this little list of don'ts helps you all to make it through another fun-filled, action-packed week of classes and tests and labs and all that *stuff* I

mentioned before. If you think I'm just long-winded and dull, well, here's one more do not: do not complain to me. As my favorite English teacher in high school used to say, "Boredom is a personal problem." (Of course, if you made it all the way to the end of this column and *now* are complaining about it being dull, well, kiddo, I think your problems may be just a wee bit more complex than we can address here.) Anyway, have a swell week all, and I'll see you next issue, same bat-time, same bat-paper.

*P.S. If you return the aforementioned disk of mine to me safe and sound, I promise to personally thank you in my next column!! Think of the notoriety and fame! (Can we say "desperate," boys and girls? I knew that we could!)*

**Kyle Raymond**

# Killing Beethoven in Letterbox

To start this week, I first must bite the bullet and admit that I made a mistake. Last week I said that Lawrence Bender co-wrote *Pulp Fiction*; well, that is wrong. Roger Avary was the co-author of the script and Academy Award winner.

Since there is a lack of new films in this area, I will talk about video releases this week. The first film is one by Roger Avary called *Killing Zoe*. Although this movie has been out for quite some time, it is an unknown film that usually just sits on the shelf at the video store. The movie stars Eric Stoltz as a small time safe-cracker who goes to Paris to help with a job. There he meets Zoe, prostitute extraordinaire, and happens to fall in love with her. As the story progresses, we begin to see Stoltz's relationship with his friends, who are heavy into the drug scene (such a surprise from a Roger Avary script). The story begins to complicate itself when Stoltz sees his purchased love, Zoe, working as a teller in the bank. By this time, the heist has gone a-foul, and we begin to see what would have happened if the *Reservoir Dogs* decided to fight each other. *Killing Zoe* is an explosive

movie filled with action, brilliant dialogue, and great camera work, which all combine to make a great movie.

The next film is set at a little slower pace. *Immortal Beloved*, starring Gary Oldman and Isabella Rossellini, is the 'based on a true story' movie about the life of Beethoven. Oldman gives an incredible performance (when hasn't he?) as the maestro himself, and Rossellini plays one of several loves. The premise of the film is much like that of Orson Wells's greatest film *Citizen Kane*. After the death of Beethoven, which is the beginning of the film, his assistant sets out to find the inheritor of Beethoven's works. All that is known about this woman is that she was his immortal beloved, a woman whom Beethoven loved completely through to his death. An action film this is not, but the score, combined with the costumes, the sets, the cinematography, the script, and the acting all left me with only one thought: wow

Finally this week, I have a complaint. This is a battle that has been going on since the development of 70mm film, that of Letterbox vs. 'Pan and Scan'. Last week I went and rented

**Pulp Fiction**, which was in the 'pan and scan' format, and I just have to say that I was very disappointed. Several scenes in that movie were shot with the camera having both actors in the shot. The most obvious example of this is when Butch is in the back seat of the cab after the fight. In this scene, he is having a discussion with Esmerelda Villa Lobos about what it is like to kill a man. The camera, in the original film, is a medium shot, through the windshield of the cab, encompassing both actors in a long shot. This does not occur on tape. On tape we see the point of view bounce back and forth between the speakers, never seeing the facial responses of the non-speaker in the conversation. The people I watched this with said I was being too picky about the movie, but I do not think so. In feature film, the director and cinematographer plan well ahead of shooting time what shots are to be used in the film. Because of 'pan and scan,' or rather the general populace not liking 'those black bars on the screen,' film lovers like myself are faced with countless occurrences of the catching phrase, "This film has been modified to fit your television."

## Health News...

CHOICES (Choosing Healthy Options Intelligently Can Encourage Success) is a new brown-bag discussion group sponsored by Student Health Services. The focus of the group will be the exploration of total-body wellness and the link between our mind, body, and spirit. Students who are struggling with fatigue, weight management, stress, and other health

issues may find this group beneficial.

The program will be held on Thursdays at noon in the Mark Twain Room of University Center East. If classes interfere with part of the program, students may come late or leave early as needed.

For more information about this new group, call Student Health Services at 341-4225.

## SUBconscious

Looking for something to do in Rolla this weekend? The Student Union Board has just the thing for you: Life In General. Life In General, to quote one band member, is "three guys who make happy, aggressive, alternative, folk-pop music." Though this description may leave something to be desired, their sound does not. Life In General thrilled audiences at more than 150 concerts last year. Life In General returns to Rolla this Saturday, 8:00 p.m., in Centennial Hall.

The SUB movies this week is **The Shawshank Redemption**. This will be screened at 7:00 and 9:00 p.m. Friday and Saturday in ME 104. For more information about upcoming events, or to find out how to join the Student Union Board and help plan future events, stop by our office in 218 UC-West or call 341-4220. (By the way, if you've read this far, stop on by the office for your free SUB keychain!! Offer good while supplies last, so hurry up!)

## Correction:

In last week's sports editorial it was stated that Willie May's is the Major League record holder for home runs in one season. The record actually belongs to Roger Maris. The sports editor apologizes for the error.

■ Carl James  
Sports Editor

## Music

from page 19

backdrop to this cultural joke grinds toe-to-toe with most any grunge act, many of whom were sucking pabulum at the songs conception.

Granted, as with many pop vocalists, what denotes style often constitutes annoyance (the voice of Phil Collins for instance), and Frank's cynical moan may at times have that effect. But this only helps to commit the melodies to memory. This, in fact, was Zappa's secret. I remember the first time my mom put cheese on my broccoli, so creamy and colorful, I forgot it was good for me.

CSC

King Crimson

**B'BOOM official bootleg-live in argentina**

Performance 8+  
Recording 10 (DAT's where it's at)

The story of this cd is frighteningly similar to last weeks Pearl jam saga. In this instance, an Italian com-

pany sent a rep to bootleg three groups playing in South America, Crimson being among them. The hideous resultant product sells currently for 28 pounds in the UK.

In the true spirit of music, King Crimson answered the dark marketeers with this divine 2 disc collection.

This show marks the first live performance of King Crimson in ten years, and although I am often pensive about bands in semi-retirement, without doubt this collection was worth the wait.

For over two hours, Fripp and Co., including long-time collaborating guitarist Adrian Belew and art-rock ancient Bill Bruford (Yes, Genesis) on drums, spin fresh webs of sound over a format ranging from their recent release **Thrak** to dark age Crimson classics such as **Red**. And if fine music may be likened to the weaving of a web, then "live in Argentina" is **SOME PIG**. There are no cobwebs here, just glistening shards of sound (imagine a slice of the Aurora Borealis). The duel-

ing psycho-guitar work on "The Talking Drum" might set the timid back a few months in therapy, while side starters "VROOM" and "VROOM VROOM," respectively, stomp on your adrenal gland, guaranteeing a healthy 160 bpm. Moreover, it is not only the newer material which stands out; even Crimson standards such as "Lark's Tongue in Aspic" seem infused with new and potent life.

In fact after taking a long respite from the progressive genre myself, I must say I was quite impressed (and relieved) to find that despite the stagnation of progenitors such as YES and Genesis, King Crimson remains true to the arte.

CSC

Dave Matthews Band

**Under the Table and Dreaming**  
RCA

Performance: 7  
Sound Quality: 7

Yeah, I know this isn't one of the

latest albums to hit the music scene, but I figured since it has gotten notoriety on MTV and decent radio play, it needed to get a full evaluation by one of everyone's favorite *Miner* critiques. When I first picked up the cd, I noticed the lay-out on the cover of a giant swing-a-ma-bob thingy that everyone has ridden in every school picnic or carnival. I opened this plastic case and there, to my surprise, was a solid black cd with no pictures or strange designs that frequent the top of cd's. This was a shocker because after all the hype I heard about this cd, I would have thought they would have done something to make the cd look rather bizarre, but it had to be a cover-up for what was in store for the music. Immediately, I edged the forward button to the most known track, "What Would You Say." I am pleased to say that the recorded version is almost identical to the video cut, so I was happy. The following songs "Satellite," "Rhyme and Reason," and "Typical Situation" are all very mellow, slow songs that are pretty cool if you just want to crash on

the couch and veg for a bit or on one of those happening dates where you wish a little more was going on than the ice cubes melting in your soda glass. The saxophone and mild guitar accompaniment with Dave's voice definitely put ya' in that Barry White mood, singing along in that sublevel voice of "Working on homework and listening to this cd would be a pretty good combination if it wasn't for the need to actually finish the homework and not fall asleep while doing it. The implementing of "Ants Marching" right in the middle of the selections livened up the mellowness a bit and prepared ya' for the first cuts of further soothing sounds of saxophone and guitar. This album shifted my opinion from a sappy bunch of songs to one that I would enjoy having in my collection for a well-planned evening with one's imagination.

## Second

oved the "where are we problem. I've even heard students renting a mob to trip to Disneyland. But if a fancy car stop you, as long as it runs! H m m m... M Disneyland brings up a little to road trips. A good particular destination, the way to plan a road trip on two things: 1. Time. Money available for the element works like this: out of class at 4:50pm, 4:00am. That gives us 15 minutes (at the speed limit) before we have to turn back. Jerri, may bring your notebook for the cut it close." The which sometimes is even cut, we've only got \$12.12. Maybe we better eat. Yes, you can plan email, with times, destin

from page 7

solved the "where are we gonna sleep" problem. I've even heard of a group of students renting a mobile home for a trip to Disneyland. But don't let lack of a fancy car stop you. Any car will do, as long as it runs!

Hmmmm... Mentioning Disneyland brings up another good rule to road trips. A good road trip has no particular destination in mind. You see, the way to plan a road trip is to base it on two things: 1. Time available, and 2. Money available for gas. The time element works like this: "Okay, I get out of class at 4:50pm on Friday, and Jerri has her first class on Monday at 9:00am. That gives us 64 hours and 5 minutes (at the speed limit, mind you!) before we have to turn around and come back. Jerri, maybe you better bring your notebook for class, in case we cut it close." The money part, which sometimes is even more important, goes something like this: "Uh, Scott, we've only got \$12.63, including the twelve cents we found under the seat. Maybe we better fill up the tank and head home now!"

Yes, you can plan out a trip in detail, with times, destinations, hotels,

etc. But what you really have at that point is just a family vacation like you always took with your parents. Is that what you want? Half the fun of a road trip is the uncertainty involved. Where are you going to sleep (or, are you going to sleep at all?)? What road do you want? Will we find gas before we run out of fumes? You get the idea. If you set deadlines or definite routes you will follow, you blow out any freedom you have in the trip. Imagine the following: "Gee, we can't stop and waste in this beautiful little stream. We have to be at the hotel by 6:00, or we lose our deposit." Sounds like fun, doesn't it? Wrong! It's a lot more fun to be free to go anywhere and do anything (that is legal, anyway)! Stop and do those fun/silly/useless things that you never had time to do on family vacations. Can't you just hear dear old Dad: "No, we can't stop now. We're on vacation! We'll be late if we stop!" (Of course my dad had a good solution to that, we just never went on vacation! Sorry, Dad, I had to say it.)

Other things to consider on road trips:  
- take a map, not to find your way to any

particular place, but to find out where you are when you finally get lost...

- take lots of snacks (salami, cheese, chips, popcorn, Mountain Dew, M&M's, etc.), just in case you get so far off the main drag that you can't find a store...

- sleeping stuff (bags, blankets, pillows, etc), since you don't really know where you'll be when you get too tired to drive...

- money (what's that?), at least enough to buy a tank of gas or two... By the way, always reserve a couple of dimes for that phone call back home when the car breaks down. That's also when the map comes in handy, so you can tell your friends (the timid ones who didn't come with you) where you are...  
- cards, stupid games, etc. (the M&M's you brought for snacks come in handy here, too, for betting chips when playing poker!)

- your Bible, so you can reflect on God's word when you stop and bask in the beauty of a sunset, or sit and listen to a wonderful waterfall tucked exquisitely back in the mossy rocks...

- a change of clothes, so you have something to wear as you dry out the set

of clothes you got wet when you fell in the lake...

Things not to take on a road trip:

- booze, drugs, etc. (if you read this far, and don't understand why yet, I'm sorry!)

- homework (sorry, professors, but homework does kind of ruin the mood!)

- makeup, razors, etc....I mean, come on, do you really think you'll have any need of this stuff?...

I guess the last thing we should talk about is where does one go on a road trip. Well, really, it doesn't matter. Some people just start driving, in a random manner. Sometimes you may have a general idea of direction. Sometimes you may know that you want to go to a beach, or through Tennessee, or whatever. But please, don't be too specific. That way, if you don't make it to a particular place... so what?!? I've been on road trips that only ended up going as far as the nearest good fishing stream. I've also been on a road trip that ended up stopping when we ran out of road on the shores of the Arctic Ocean! I've also been on road trips to Alaska, as well as to the nearest town, taking back

country roads that usually no one travels. I've been on road trips where we never stopped driving, and on road trips where we got nowhere because we kept stopping to closely look at (or play on or buy or tour in) whatever we saw. Be free. Be bold. Just take off and enjoy it.

By the way, timing is important. It is not recommended that you embark on a road trip the day before a mid-term or the day before that big professional test. Then again, if you need to relax, maybe you should!

If you'd like more details on some of the road trips I've experienced, I suppose I could write about them in this column. Zap me an e-mail note and let me know what you think. Remember, I'm at [sla@umr.edu](mailto:sla@umr.edu).

**DON'T FORGET...** University only lasts so long, so get those road trips in! In spite of what you may think, road trips are harder to take as you get older and have more responsibilities. Then again, you "Second Time Arounders," maybe a good road trip would do you good! Pack up the kids and give it a shot!

## SOFTWARE AND SYSTEMS PROFESSIONALS

### OPPORTUNITIES FOR UPCOMING GRADUATES

Intergraph Corporation is a billion dollar international company and a world leader in the CAD/CAM/CAE industry. We are part of a team that has been selected to perform a major Operations and Maintenance contract. Our team needs your experience in MC&G systems in the following functions for the St. Louis, Missouri and Washington, DC metro areas:

### SOFTWARE PROFESSIONALS

Entry-level to four years of experience using C, C++, and UNIX. BS or equivalent required.

### SYSTEMS PROFESSIONALS

Entry-level to four years of experience in system analysis, system interface, fault isolation and repair, system-level integration and test, software-based diagnostics, open systems architectures, and network communications. BS or equivalent required.

We also have requirements for:

- Configuration Management
- Systems Support • Computer Maintenance
- Systems Architects • Administrative Support

All applicants must be able to provide proof of US citizenship, meet eligibility requirements for access to classified information, and will be subject to a security investigation. Please send or e-mail your resume, indicating position of interest, to: **Intergraph Corporation, Human Resources-DC, Dept. AMP905, Huntsville, AL 35894-0003; email: mdcummin@ingr.com (No attachments - ASCII text only.)** For more information on Intergraph Corporation, visit our web site at <http://www.intergraph.com> Principals only. No phone calls, please. All inquiries will be held in strict confidence. An Affirmative Action/Equal Opportunity Employer.

### PICTURE YOURSELF TEACHING OVERSEAS

As a Peace Corps Volunteer in education, you can bring the world to students in developing nations through math, science, English, industrial arts, and other subjects. You can qualify for many positions with an education degree or a bachelor's degree and at least three consecutive months of subject area tutoring.

Your work as primary or secondary classroom teacher, teacher trainer, or curriculum developer can mean students will have the chance to learn the basics, stay in school, and grow up with the skills and knowledge they need to lead more productive lives.

Over 2,100 education Volunteers are serving right now in over 70 countries around the world—helping students learn and making a difference in their future. Why don't you join them?

800-424-8580 (option 1)  
E-mail:  
chicago@peacecorps.gov

### PEACE CORPS

The toughest job you'll ever love.

Volunteers must be U.S. citizens and meet other qualifications. The term of service is two years. The minimum age is 18, but there is no upper age limit. Peace Corps does not discriminate on the basis of race, sex, religion, age or sexual orientation. All Peace Corps programs are administered on a non-discriminatory basis.
